

Plate Loaded 2.0

Exigo® 45 Degree Leg Press

SKU: PL-3126

- ✓ Designed & manufactured in our UK factory
- ✓ Conforms with ISO/CEN equipment standards
- ✓ Commercial use structural lifetime warranty

The Exigo® Plate Loaded 2.0 45 Degree Leg Press is the ultimate lower-body strength machine built to deliver precision, comfort, and safety in one heavy-duty design. Able to handle the heaviest loads, and perfect for building the quads while also strengthening the hamstrings, glutes and calves. This machine is engineered in Britain for serious gyms and high-performance facilities who demand exceptional build quality.

It features an adjustable back pad with 3 positions to ensure comfort while optimising the angle of the hips and an adjustable safety stop with 5 settings. Premium 40mm linear bearings guarantee ultra-smooth and consistent movement, while the large platform with anti-slip footplates and support handles provides maximum stability under load. With 4 stainless steel loading points and a huge 1040kg weight capacity, this machine is made for elite level performance.

The Exigo® 45° Leg Press is complete with an assistance handle for easy entry and exit, band pegs for reverse banding to reduce the starting weight, and 4 extra-large storage horns to keep weight plates close by.

Standard Colour Options (More colours available on request)

Features

Custom Adjustments

Equipped with a 3-position adjustable back pad and adjustable safety stop with 5 settings.

Premium Bearings

Equipped with premium 40mm linear bearings to guarantee ultra-smooth and consistent movement under heavy loads.

Integrated Storage

Includes 4 extra-large storage horns, providing ample space to keep weight plates easily accessible and organised.

Maximum Stability

A large platform with anti-slip footplates and support handles provide maximum stability throughout the movement.

Reverse Banding

Supports reverse banding to reduce the starting weight and assist the lift.

Long-Term Durability

Key components are made from stainless steel for resistance to rust, wear, and heavy use, providing long-term durability.

Four Loading Points

Equipped with 4 stainless steel loading points to support a huge maximum load of 1040kg for elite level performance.

Assistance Handle

Complete with an assistance handle located on the platform to make entry and exit safe and effortless.

Made in Britain

Designed and manufactured in Great Britain for superior build quality.
